Features / Bug Fixed Snippet

Task 1 - Floor Traps: Added visible floor traps. Stepping on a trap resets the player to the original start without regenerating the dungeon and shows a status message.

Task 2 - Enemy Guard: Added a guard near the chest with continuous back-and-forth patrol movement. Collision resets the player to start and shows a status message.

Task 3 - Mini-map: Added a real-time mini-map based on the actual dungeon grid, showing walls, floor, key, chest, traps, player and guard.

Task 4 - Inventory UI: Added a HUD inventory slot that is empty initially and immediately displays a key icon after key pickup.

Bug Fixes / Preservation: Preserved player movement, key collection, chest completion and restart functionality. Traps and guard collisions do not regenerate the dungeon or make completion impossible.

Testing Completed

Trap reset; guard patrol/collision reset; real-time mini-map; inventory before/after key pickup; key-to-chest completion; R restart.
